***Hollywood Public Utilities to Host Community Meeting Regarding
Installation of McKinley Street Interceptor***

HOLLYWOOD, FL – The City of Hollywood Department of Public Utilities will be holding a community meeting regarding the start of a two year process of installing a major transmission pipeline on McKinley Street between North 24th Avenue and North 14th Avenue. The meeting will be held at the **Fred Lippman Multi-Purpose Center Center on Thursday, May 27 at 6:00 p.m.** The Fred Lippman Multi-Purpose Center is located at **2030 Polk Street.**

Utilities staff will share information and address questions about the McKinley Street project. The pipeline replacement is necessary to divert flow from the existing Taft Street utility pipeline which is over 40 years old and in need of repairs and improvements. The new pipeline will measure up to 5½ feet in diameter. Installing a pipeline of this size and scope will have significant impacts on the community and traffic, limiting access to properties during phases of the project.

For information about the community meeting, contact the City of Hollywood's Department of Public Utilities at 954.967.4455. For media inquiries, contact Kris Rebar, Public Relations Coordinator at 954.921.3023.
